**LUNA NERA ENGINEERING SERVICES & CO.**

Address: # 25 Limonade, Cap-Haitian

**Position: Python/Django Developer**

**June 2021-Aug 2022**

- Collaborate with senior developers to design, develop, assess, and maintain web applications using Python and Django.
- Write clean, efficient, and well-documented code following best practices and coding standards.
- Identify and resolve software defects and issues by debugging and testing code.
- Work with databases, design and optimize database schemas, and write SQL queries when necessary.
- Integrate front-end templates with Django views and templates, ensuring a seamless user experience.
- Use version control systems (e.g., Git) to track code changes and collaborate with team members.
- Collaborate with cross-functional teams, including designers, product managers, and quality assurance, to deliver high-quality software products.
- Maintain documentation of code, processes, and project-related information.
- Stay up-to-date with the latest Python and Django trends and technologies and continuously improve my skills.

**LUNA NERA ENGINEERING SERVICES & CO.**

Address: # 25 Limonade, Cap-Haitian

**Position: NodeJS Backend Developer**

**August 2022-Feb 2023**

- Collaborate with senior developers to design, develop, test, and maintain server-side applications using Node.js.
- Write clean, efficient, and well-documented JavaScript code following best practices and coding standards.
- Create RESTful APIs and integrate them into web applications, ensuring optimal performance and reliability.
- Work with databases (e.g., SQL or NoSQL databases) to design schemas, write queries, and manage data storage efficiently.
- Use Node.js package managers like npm or yarn to manage project dependencies and packages.
- Utilize version control systems (e.g., Git) to track code changes and collaborate with team members.
- Work closely with cross-functional teams, including front-end developers, designers, and quality assurance, to deliver high-quality software products.
- Identify and resolve software defects and issues by debugging and testing code.
- Maintain documentation for code, processes, and project-related information.

## **SKILLS**

---

- MySQL
- JavaScript
- CSS
- Git
- REST
- APIs
- CI/CD
- HTML5
- Microsoft SQL Server
